

**Lancaster County Career & Technology
Center**

Placement Services Plan

2018-2021

Introduction

The Lancaster County Career & Technology Center provides placement services for program graduates and other students as resources allow. Students are informed of services available on the school website (<https://lancasterctc.edu/>), in a placement brochure and in program orientations. Students are required to create a resume and a cover letter to be used in searching for employment opportunities that provide a good fit for the student and the employer.

During the enrollment process, Student Services personnel collect placement information from incoming students. Program orientations inform new students of the importance and value of student outcomes as an indication of the quality and relevance of our programs. Students are asked to share changes in their employment status by going online and completing the Student Follow-up Survey, which includes questions to determine whether the placement is related or unrelated to the training program the student is enrolled in as well as qualitative questions used to assess the effectiveness of training. During program advisement, instructors help students set employment goals and provide information about qualifications required in industry. Instructors also work with industry partners and inform students of employment opportunities. Students receive a letter when they graduate with information about job placement services, restating the importance of successful outcomes and requesting that the student complete the Follow-up Surveys.

Placement and follow-up includes the collection of data from graduates and non-graduates as well as employers of graduates to evaluate the impact and resulting quality of our programs and training. **All program completers will receive placement services as a condition of their program.** The following plan outlines the plan for LCCTC placement and follow-up services.

Coordination of Services

The Assistant Principals/Directors/program faculty at each campus are responsible for all placement and follow-up activities, including coordination and communication with faculty, employers, and students. Each Assistant Principal/Directors/program faculty at each campus maintains job listings, and records and evaluates reporting of placement and follow-up data. The Assistant Principal/Directors/program faculty at each campus coordinates placement services and communication between faculty, students and businesses and industries by maintaining student placement contracts and visiting placement sites. In addition, the Assistant Principal/Directors/program faculty at each campus oversees employment opportunities on the website and campus job boards, notifies students available for employment, and provides guidance to students who are looking for employment.

The collection of placement and follow-up data is a collective effort between students, faculty, and employers of graduates and staff members. The survey data and resulting reports provide valuable information that can be used to improve the quality of education in each program as well as improve student outcomes.

Job Placement Services

➤ **Job Placement Advisory Committee**

The Job Placement Services advisory committee meets at least once annually to revise follow-up surveys, review the results of the surveys, create and maintain Placement and Follow-up Plans, and discuss the development and improvement of professional development courses relating to outcomes. The committee also develops objectives for improving placement and follow-up services. The committee also exists to evaluate reporting requirements and to develop institutional policy, processes and strategy that supports accurate data collection and reporting. Program Reviews, conducted by the Executive Director, are used to provide qualitative feedback to instructors and directors on program compliance with defined standards of performance, including outcomes.

➤ **Job Interview Week**

Each year, the LCCTC convenes a Job Interview Week that invites employers to interview all students in the corresponding program area that their company represents. The Job Interview Week is coordinated by the Assistant Principal/Instructional Coach with help from the faculty at each campus. Each student participates in multiple interviews with actual employers. The employers provide feedback to students to assist with future interviews as well as give them an opportunity to evaluate students to employ.

➤ **Job Boards**

Detailed information about employment opportunities is available to students on Job Boards located in the cafeteria at each campus and located on the LCCTC website. (www.lancasterctc.edu) → Adult → Current Students → Job Board)

This information is maintained by the Assistant Principals and students are encouraged to use this site for available openings. Employers can submit jobs by completing the request on the Employer Job Posting Page on the following link:

<http://www.lcctc.org/cms/module/selectsurvey/TakeSurvey.aspx?SurveyID=136>

➤ **Student Advisement/ Counseling**

The LCCTC counselors, faculty, and the PN Success Coach are available during regular school hours and appointments as necessary to provide guidance in academic, employment, financial and/or personal counseling that might be necessary. School counselors are also available and are trained in dealing with both everyday student concerns and issues and also grief counseling, drug and alcohol and, emergency situations. Students are encouraged to work with the program instructor in identifying local business and industries that may target the student's strengths as they near completion of their program. Students can meet with the Assistant Principal/program faculty/PN Success Coach to submit a resume and cover letter. The Assistant Principal uses this information to assess the student's training, skills, and background in an effort to match employment opportunities with the skills of the student. The Assistant Principal advises the student on job search, interview and presentation strategies during campus-wide co-op and clinical meetings.

Follow-up Data Collection and Reporting

The following system is used to ensure that the collection of follow-up information from completers and non-completers, as well as employers of graduates is collected, reported and used to evaluate program effectiveness in meeting employer and industry needs.

Follow-up information on completers and non-completers is collected from multiple sources. Follow-up data is collected at the end of each program and every January, April, July, and October. Reports are generated from this data and made available for various reporting requirements as necessary. The Supervisor of Secondary and Post-Secondary Student Services is responsible for maintaining these records. Students who withdraw or graduate from the LCCTC with no evidence of follow-up information are considered “negative outcomes.”

1. **End of Program-** (Completed during last month of their program)
 - **Graduate Survey** that includes information regarding current Employment and/or Post-Secondary Status.
 - **Negative Outcome Lists** are generated for students that have not verified employment, continuing education or military service for follow-up that includes: contact information, particularly address, phone, and email. The Negative Outcome List is given to instructors, who are responsible for attempting to contact the students to collect follow-up information.

2. **January**
 - **Employer Survey** The CTC has surveys that are given to employers to capture employer feedback regarding student performance in comparison to graduates of other institutions. This information is used as a measure to improve and evaluate the training program with regard to employer expectations.

3. **January/April/July/October**
 - **Negative Outcome Lists** are generated for students that have not verified employment, continuing education or military service for follow-up that includes: contact information, particularly address, phone, and email. The Negative Outcome List is given to Assistant Principals/Directors/program faculty, who are responsible for attempting to contact the students to collect follow-up information. Assistant Principals/Directors/program faculty will also make contact with these students to have them seek assistance from the local CareerLink office.

Outcomes

Placement and follow-up data is reported to the Joint Operating Committee. Program Reviews, conducted by the Administrative Director, are used to provide qualitative feedback to instructors and directors on program compliance with defined standards of performance, including outcomes.
